IDENTIFIERS *Ontario

ABSTRACT

Data showing patterns in enrollment by institution and the demographic characteristics of students (part-time and full-time) at various program levels within the universities, colleges, and private trade schools in Ontario are examined, and emerging trends are assessed. Analysis is provided by institution, sex, age, legal status, province of residence and country of citizenship. Enrollment data, particularly where demographic characteristics are involved, are generally reported as of the fall term. Five academic years are covered: 1974-75 through 1978-79. Numerous enrollment trends are highlighted; for example: undergraduate enrollments in universities increased over the five-year period for both full-time and part-time students; enrollment in colleges in both postsecondary and non-postsecondary programs increased 1 percent; and increases in enrollment in occupational courses accounted for the greatest portion of increasing enrollment in part-time, non-postsecondary registration. Examples of the highlighted demographic trends are: the age distribution of students over the five-year period from 1974 to 1978 show little change; the proportion of women enrolled in colleges and universities has increased; the proportion of Canadian citizens and landed immigrants enrolled in the colleges full-time was 94.9 percent in 1974; 97.8 percent in 1978; and foreign student enrollment in full-time postsecondary programs in 1978 was primarily from Hong Kong, Nigeria and Guyana. INTRODUCTION

Purpose

This report was prepared in response to requests for enrolment data to deal with current policy concerns of the Ministry and the institutions. One such concern was to determine the possible changing demands due to shifts between part-time and full-time enrolment. It was felt that data which showed patterns in enrolment by institution and the demographic characteristics of students, at various program levels within the universities, colleges, and private trade schools could be used to help assess the possible impact on the system of emerging trends.

It is hoped that a regular series of enrolment reports will be produced. These should meet the current and ever-changing needs for management information. For this reason, the content and organization of the present report should not be considered as a model for future reports.

Scope and content

This report includes enrolment data, both part-time and full-time, for the universities, Ryerson, Ontario College of Art, colleges of applied arts and technology, the Ontario Agricultural Colleges, and the registered private vocational schools.

Analysis is provided by institution, sex, age, legal status, province of residence and country of citizenship.

It should be noted that enrolment data particularly where demographic characteristics are involved, are generally reported as of the Fall term. This is the only period for which the demographic data required for analysis are available.

Unless otherwise specified, all statistics are based on student head counts, as of the specified count dates. Course registrations are employed when head counts are unavailable.

The basic enrolment data are reported for five academic years, 1974 through 1978. Demographic background data required for analysis have not been regularly reported over this time span for other than universities and post-secondary programs in the colleges of applied arts and technology. For this reason, demographic analyses are limited to university programs, excluding Ryerson and the Ontario College of Art, and post-secondary programs in the colleges.

Source and method

The data were compiled from the following files and records:

1. University Affairs Reports (UAR)
2. University Student Information System (USIS)
3. Combined USIS and UAR systems (in operation since 1977 only)
4. Ontario College Information System (OCIS)
5. Part-time Post-secondary Student Questionnaire Survey (PTSQ)
6. College Affairs Branch Mid-Term Survey (CAB Mid-Term)

A supplementary phone survey of individual institutions was employed when necessary to supplement existing data sources.

In keeping with the purpose of the report, every effort has been made to ensure comparability and compatibility of the data between types of institutions and across the five-year time span. However, data are not strictly comparable in every area. The reader should refer to the footnotes attached to each table before drawing conclusions about differences and trends.

Interpretation and limitations of the data

A number of characteristics and limitations should be kept in mind in interpreting and applying the data in this report. These arise because of the characteristics and limitations of the individual systems from which the data were derived and the problem of comparing data from a number of systems which are not strictly comparable in certain respects, including data element definition, reporting period, methods of data collection, processing, analysis, etc.

University data

1. Data are taken primarily from the USIS system, which is intended for statistical use. Data are also included from the UAR system, which is intended for financial purposes. The classification of students between the undergraduate and graduate levels differs slightly between these two systems.

2. All university reports are based on head counts as of November 1 count date, for 1976, 1977 and 1978. The reporting date employed before 1976 is December 1.

3. Enrolment data for all universities include affiliated colleges where applicable.

4. For all tables reporting enrolment by the demographic characteristics of the students, data were compiled from unrounded tabulations from the USIS file. To protect the anonymity of individual students, aggregated amounts were amended to show three for any number less than four.

5. All tables reporting enrolment in part-time credit courses include enrolment in correspondence programs.

6. Students in non-university diploma or certificate courses are included except in certain tables which provide data reported by the demographic characteristics of the students. In this case, they are always included for the years 1976 - 1978 only. Refer to footnotes for each table to ascertain whether they are included for earlier years.

7. For all tables where data are reported by the demographic characteristics of the students, students enrolled at Dominican College and the Ottawa University affiliates of St. Paul and St. Augustine are not included before 1977. These institutions did not submit data to USIS, from which these reports could be compiled. The number of students omitted is small compared with provincial totals.

College data

1. Data in aggregated tables on full-time enrolment are based on head counts obtained from the College Affairs Branch Mid Term Survey (CAB mid-term) file. The reporting date for these data was November 1 for 1976, 1977 and 1978. Before 1976, the reporting date was October 15.

2. In tables where full-time student enrolments are reported by the demographic characteristics of the students, the data are obtained from the OCIS student file.

   Data have been taken from the most recent run available. Due to revisions in the file taking place throughout the year, the total enrolment for any one year varies slightly from report to report.

3. Part-time enrolment reported at the aggregate level is based on course registrations accumulated between the summer count date (July) and the Fall count date (November 1 or October 15, before 1976).

   Accurate head count information is not available for post-secondary or non-post-secondary programs. For this reason, apparent changes in enrolment may be due, in part, to fluctuating patterns of course load carried by the student, rather than changes in the number of students being served.

4. The percentage of total part-time registrations which are post-secondary in each year may be considerably underestimated using the data in this report because a higher proportion of part-time post-secondary course registrations occur after November 1. In addition, the percentage of total part-time registrations which are part-time post-secondary is also an underestimate of the percentage of total part-time activity which is part-time post-secondary activity because the average number of contact hours per course is higher in part-time post-secondary courses than in part-time non-post-secondary courses.

5. Tables giving enrolment for part-time students reported by the demographic characteristics of the student are based on information derived from the part-time post-secondary student questionnaire administered in the colleges. This questionnaire was administered in the Fall of each year from 1973 to 1977. Data for fall 1978 reflects demographic patterns apparent in the fall 1977 data. Headcounts were derived from actual course registration of fall 1978. Data in these tables are subject to certain limitations due to the sample survey method of collection.

Ontario Agricultural College data

1. Data for full-time enrolments were obtained from the Ministry of Agriculture and Food. This Ministry does not collect data on part-time students.

2. Data on part-time enrolment were obtained from informal telephone surveys conducted by the Information Resources Branch in 1975, 1976, 1977 and 1978. No information was collected for 1974.

3. The data are based on head counts taken in the first few weeks of the Fall term, rather than the November 1 count date used for college and university data.

Private vocational schools data

Data for statistical use were collected for the first time in 1976. In prior years only estimates were available. For years before 1978, data for full-time, part-time and home-study students were not collected separately and coverage of home-study students was probably only partial.

HIGHLIGHTS: INSTITUTIONAL TRENDS

University and college enrolments, fall of 1978

Full-time student enrolment in universities and colleges of applied arts and technology was approximately 240,000 in 1978. (See tables 1.1.1, 1.1.3, 1.2.1, 1.2.2.)

This enrolment was distributed as follows:

	Enrolment level	%
University:	full-time undergraduate:	58
	full-time graduate:	6
	Subtotal	64
College:	full-time post-secondary	27
	full-time non-post-secondary	9
	Subtotal	36
	Total	100

Part-time student enrolment[1] in universities and colleges of applied arts and technology was approximately 235,600 in the Fall of 1978. (See tables 1.1.2, 1.1.4, 1.2.3.)

This enrolment was distributed as follows:

	Enrolment level	%
University:	part-time undergraduate:	29
	part-time graduate:	5
	Subtotal	34
College:	part-time post-secondary	20
	part-time non-post-secondary	46
	Subtotal	66
	Total	100

Total enrolment in Ontario colleges and universities (full-time and part-time students) was slightly less than one-half million in the Fall of 1978 or about 5.6 per cent of the Ontario population[2].

---

(1) Statistics on part-time enrolment in the colleges are estimated from course registrations. A factor of 1.3 course registrations per student is used.

(2) Population projections for Canada and the Provinces (1972-2001), Statistics Canada 91-514. Projection B gives total population of 8.5 million.

Trends in university enrolments, 1974-1978

Total enrolment (full-time and part-time students) including Ryerson and Ontario College of Art, increased 5.6 per cent over the 5 year period between 1974 and 1978. (See table 1.1.5.) Much of this increase occurred in the early part of the period with a peak enrolment of 241,700 in 1976. The last two years reported show small declines: 2 per cent in 1977 and 1 per cent in 1978.

Undergraduate Enrolment increased over the 5 year period for both full-time and part-time students. Full-time undergraduate enrolment peaked in 1976 at 145,100 while part-time undergraduate enrolment peaked in 1978 at 68,200.

Overall increases for the 5 year period amounted to 4.7 per cent for full-time and 9.5 per cent for part-time students. (See tables 1.1.1, 1.1.2.)

Full-time graduate enrolment decreased by 6.7 per cent over the 5 year period. Graduate enrolment dropped to 15,400 in 1978, from a peak of 17,700 in 1975. (See table 1.1.3.)

Part-time graduate enrolment increased by 12.9 per cent over the 5 year period to 12,127 in 1978 with a small decline of 1.7% between 1977 and 1978. (See table 1.1.4.)

Trends in college enrolments, 1974-1978

Total Enrolment is made up of full-time students enrolled in both post-secondary and non-post-secondary programs as well as students registered on a part-time basis in these program areas(3).

Total full-time enrolment in the colleges including both post-secondary and non-post-secondary programs increased 17.0 per cent over the five year period from 73,216 in 1974 to 85,684 in 1978. (See tables 1.2.1, 1.2.2.)

Total part-time registrations for both post-secondary and non-post-secondary areas increased by 43.1 per cent in the same period from 141,056 in 1974 to 201,845 in 1978. (See table 1.2.3.)

Full-time post-secondary enrolment increased by 17.9 per cent from 54,978 in 1974 to a total of 64,813 in 1978. The growth rate was between 4 and 6 per cent for all years except between 1975 and 1976 when it was less than 1 per cent. (See table 1.2.1.)

Part-time post-secondary course registrations also increased over the 5 year period. The increase was 3.5 per cent. The part-time enrolment in the post-secondary area as a percentage of total part-time college enrolment has, however, been declining slightly since 1974. (See table 1.2.3.)

---

(3) Direct comparisons between full-time and part-time enrolments in the colleges depend on estimates of part-time enrolment derived from course registrations. (See footnote (1).)

Full-time non-post-secondary enrolment (including both adult training and apprenticeship) increased by 14.4 per cent between 1974 to 1978.

There was an increase in enrolment in apprenticeship programs over the 5 year period of 32 per cent. The enrolment dropped for the first time in 1978 (3.27% under the 1977 level).

The increase in enrolment in adult training programs for the period was 12 per cent. The enrolment peaked in 1975, 17,900, dropped slightly to 17,300 in 1977 and increased again to 17,824 in 1978. (See table 1.2.2.)

Part-time non-post-secondary course registrations, (including general interest courses and occupational courses) increased consistently over the 5 year period more rapidly than in any other area reported. Registrations were 83,200 in 1974 and 142,000 in 1978, an increase of 71 per cent.

Increases in enrolment in occupational courses accounted for the greatest proportion of this increase, from 39,000 in 1974 to 85,500 in 1978, an increase of 119 per cent for this subgroup.

The increase in enrolment for general interest courses was 28 per cent, ranging from 44,200 in 1974 to 56,500 in 1978. The enrolment in these courses went through a period of decrease and minimal growth in 1975 and 1976. (See table 1.2.3.)

HIGHLIGHTS: DEMOGRAPHIC TRENDS

Sex

The proportion of women enrolled in colleges and universities, (including both part-time and full-time) has increased over the period from 1974 to 1978. (See tables 2.1.1, 2.2.1.)

The increase in the proportion of women enrolled in the universities, was 14 per cent, from 90,000 women enrolled in either part-time or full-time programs in 1974 to 102,200 women in 1978.

The pattern of growth was steady throughout the period; females accounted for 43.8 per cent of total students in 1974 and for 47.7 per cent in 1978. The increase in female enrolment is most apparent in graduate programs. In part-time graduate programs, it has increased from 24.6 in 1974 to 35.2 per cent in 1978. The percentage of females is higher than males in part-time undergraduate programs. In 1978 it was 60.6 per cent. (See table 2.1.1.)

The increase in the proportion of women for the colleges was 24.6 per cent, from a total of 46,500 full-time and part-time in 1974 to 57,952 in 1978. As in the case of universities the pattern of growth of women in the colleges has been more rapid for part-time enrolment than for full-time, ranging from 46 per cent female in 1974 to 55.0 per cent female in 1978. The percentage of females in full-time post-secondary programs is higher than the percentage of males. In 1978 it was 52.8 per cent, up from 51.4 per cent in 1974. (See table 2.2.1.)

Age

The age distribution of students over the five year period from 1974 to 1978 shows little change for either the universities or the colleges. (See tables 2.1.2, 2.2.2.)

Legal status

The proportion of Canadian citizens and landed immigrants enrolled full-time in the universities in 1978 was 93.4 per cent of total full-time student enrolment, including both undergraduate and graduate programs. This proportion has been almost constant since the Fall of 1974. In numerical terms there has been an increase from 127,200 in 1974 to 134,500 in 1978. (See table 2.1.3.)

The proportion of Canadian citizens and landed immigrants enrolled in the colleges as full-time students in post-secondary programs was 97.8 per cent in 1978. This proportion has increased only slightly from 94.9 per cent in 1974. The change corresponds to a numerical increase of Canadian citizens and landed immigrants from 51,700 in 1974 to 62,000 in 1978. (See table 2.2.3.)

The proportion of foreign students enrolled as either full- or part-time students in the universities in 1978 was 5.0 per cent of total university enrolment, including both undergraduate and graduate programs. This proportion has increased from 3.2 per cent in 1974. The change

corresponds to an increase in the number of foreign students from 6,500 in 1974 to 10,700 in 1978. (See table 2.1.3.)

The proportion of foreign students enrolled either full- or part-time in college post-secondary programs in 1978 was 1.7 per cent of total post-secondary enrolment(4). This proportion has declined since the Fall of 1975 when it stood at 2.9 per cent. The change corresponds to a decrease in foreign student enrolment from 2,800 in 1975 to 1,800 in 1978.

Data on foreign students are not available for non-post-secondary college programs.

Province of residence

The proportion of Canadian citizens and landed immigrants in either undergraduate or graduate programs (full-time and part-time) in the universities in 1978 who were Ontario residents was 91.4.

The only province outside Ontario which contributed appreciable numbers of students to university enrolment was Quebec. In 1978 enrolment of Quebec residents in all university programs was 4.2 per cent of Canadian students and landed immigrants. This proportion was the same in 1974. The numbers of Quebec residents enrolled increased between 1974 and 1978 by 4.4 per cent, compared with an increase of 9.0 per cent for Ontario residents. (See table 2.1.5.)

The proportion of Canadian citizens and landed immigrants in full-time post-secondary programs in colleges in 1978 who were Ontario residents was 96.7 per cent. This proportion has been almost constant since 1974. There has been an increase in the number of Ontario residents enrolled in these programs from 49,700 in 1974 to 57,700 in 1978.

As in the case in the universities, the only province outside Ontario which contributed appreciable numbers to full-time post-secondary college enrolment was Quebec. In 1978 the enrolment of Quebec residents was 1.8 per cent. This proportion decreased slightly from 2.2 per cent in 1974. In numerical terms Quebec residents enrolled decreased from 1,146 in 1974 to 1,100 in 1978.

The percentage of Canadian citizens and landed immigrants resident in other countries and enrolled in full-time post-secondary programs was negligible, 225 in 1978. This number is down from a peak of 294 in 1975. (See table 2.2.5.)

Data on province of residence are not available for either part-time post-secondary programs or full-time and part-time non-post-secondary.

---

(4) Estimates based on College enrolments from part-time course registrations. Totals include "not reported".

Country of Citizenship

Foreign students enrolled in either undergraduate or graduate programs in universities in 1978 are primarily from the U.K., U.S.A. and Hong Kong. Together they account for just over 50 per cent of all foreign students enrolled in 1978. This proportion has remained almost constant since 1974.

In 1978, 20.4 per cent of foreign students came from Hong Kong, 17.4 per cent from U.K. and 13.2 per cent from U.S.A. (See table 2.1.4.)

Foreign student enrolment in full-time post-secondary college programs in 1978 was primarily from Hong Kong, Nigeria and Guyana. Together they accounted for over 44 per cent of all foreign students in 1978. These were distribued between Hong Kong 23.8 per cent, Nigeria 15.0 and Guyana 5.9 per cent. (See table 2.2.4.)

These rank orders have remained almost constant since 1974.

Data on country of citizenship are not available for part-time post-secondary programs or for non-post-secondary programs.

Table		Page
1.1	ENROLMENT AND PERCENTAGE CHANGE, BY INSTITUTION, AT ONTARIO UNIVERSITIES, RYERSON AND ONTARIO COLLEGE OF ART, FALL 1974 TO FALL 1978

NOTES: a. Figures represent the number of students enrolled on the count date. (The count date changed to October 31 in 1976; previously it was September 30).
b. The Adult Training figure is comprised of: sponsored students (by Canada Manpower and others) and feepaying (tuition short) students.
c. Adult Training figures for students who are sponsored by agencies other than Canada Manpower for Fall 1974 to Fall 1978 are: 185, 386, 319, 301, and 298 students, respectively.
d. The duration of adult training programs being anywhere from 3 weeks to 52 weeks, the enrolment at a particular count date does not necessarily represent the total amount of activity in each college.

NOTES: a. The fall count date was changed to November 1 in 1976; in prior years, it was October 15.

b. The above figures represent registrations cumulated from the previous summer count date (June 30 for 1976 and subsequent years, July 15 for prior years) up to the fall term count date. (See Note 1.)

c. The following abbreviations were used: (A) POST-SEC. - Post-secondary (includes: extension, day and other students)
(B) GIC - General Interest Courses
(C) OCCUP. - Occupational Category (comprised of: short programs (non-post-secondary), career oriented courses, TIBI, MDP, apprentice and others).

d. The patterns of the distribution of registrations between general interest courses and career oriented courses (a major component of the occupational category) may be largely due to differences of interpretation of the definitions of these two groups by individual colleges.

1975	n.a.	n.a.	n.a.	28,000	97
1976	n.a.	n.a.	n.a.	47,463	127
1977	n.a.	n.a.	n.a.	45,186	165
1978	18,780	36,538	34,462	89,780	175

NOTES: a. Enrolment from 1976 onward is actual, figures for prior years are estimates.
b. Total enrolment figures include full-time, part-time and home-study students. However, the coverage of home-study students was probably only partial in years before 1978.

FOOTNOTES: 1. Represents the number of students accumulated during the enrolment year (October-September).
2. Number of schools is based on calendar year (January 1 to December 31).

SECTION - 2 Demographic Characteristics

Table		Page
2.1.1	ENROLMENT BY SEX AT ONTARIO UNIVERSITIES, FALL 1974 TO FALL 1978	
2.1.1.1	Full-time undergraduate	36
2.1.1.2	Part-time undergraduate	36
2.1.1.3	Full-time graduate	36
2.1.1.4	Part-time graduate	36
2.1.1.5	All students	36
2.1.2	ENROLMENT BY AGE GROUP AT ONTARIO UNIVERSITIES, FALL 1974 TO FALL 1978	
2.1.2.1	Full-time undergraduate	37
2.1.2.2	Part-time undergraduate	37
2.1.2.3	Full-time graduate	38
2.1.2.4	Part-time graduate	38
2.1.2.5	All students	39
2.1.3	ENROLMENT BY LEGAL STATUS AT ONTARIO UNIVERSITIES, FALL 1974 TO FALL 1978	
2.1.3.1	Full-time undergraduate	40
2.1.3.2	Part-time undergraduate	40
2.1.3.3	Full-time graduate	40
2.1.3.4	Part-time graduate	41
2.1.3.5	All students	41
2.1.4	ENROLMENT BY COUNTRY OF CITIZENSHIP AT ONTARIO UNIVERSITIES (PERSONS WITH STUDENT AND OTHER VISA ONLY) FALL 1974 TO FALL 1978	
2.1.4.1	Full-time undergraduate	42
2.1.4.2	Part-time undergraduate	44
2.1.4.3	Full-time graduate	46
2.1.4.4	Part-time graduate	48
2.1.5	ENROLMENT BY PROVINCE OF RESIDENCE AT ONTARIO UNIVERSITIES (CANADIAN CITIZENS AND LANDED IMMIGRANTS ONLY) FALL 1974 TO FALL 1978	
2.1.5.1	Full-time undergraduate	50
2.1.5.2	Part-time undergraduate	50
2.1.5.3	Full-time graduate	51
2.1.5.4	Part-time graduate	51
2.1.5.5	All students	52

2.2.1 ENROLMENT BY SEX AT ONTARIO COLLEGES OF APPLIED ARTS AND TECHNOLOGY IN POST-SECONDARY PROGRAMS, FALL 1974 TO FALL 1978

2.2.1.1 Full-time post-secondary..... 53

Estimated part-time post-secondary..... 53

2.2.2 ENROLMENT BY AGE GROUP AT ONTARIO COLLEGES OF APPLIED ARTS AND TECHNOLOGY IN POST-SECONDARY PROGRAMS, FALL 1974 TO FALL 1978

2.2.2.1 Full-time post-secondary..... 54

Estimated part-time post-secondary..... 54

2.2.3 ENROLMENT BY LEGAL STATUS AT ONTARIO COLLEGES OF APPLIED ARTS AND TECHNOLOGY IN POST-SECONDARY PROGRAMS, FALL 1974 TO FALL 1978

2.2.3.1 Full-time post-secondary..... 55

Estimated part-time post-secondary..... 55

2.2.4 ENROLMENT BY COUNTRY OF CITIZENSHIP AT ONTARIO COLLEGES OF APPLIED ARTS AND TECHNOLOGY IN POST-SECONDARY PROGRAMS (PERSONS WITH STUDENT OR OTHER VISA ONLY) FALL 1974 TO FALL 1978

2.2.4.1 Full-time post-secondary..... 56

2.2.5 ENROLMENT BY PROVINCE OF RESIDENCE AT ONTARIO COLLEGES OF APPLIED ARTS AND TECHNOLOGY IN POST-SECONDARY PROGRAMS (CANADIAN CITIZENS AND LANDED IMMIGRANTS ONLY) FALL 1974 TO FALL 1978

2.2.5.1 Full-time post-secondary..... 58

NOTES: a. ATLANTIC PROVINCES: Newfoundland, P.E.I., Nova Scotia and New Brunswick.
WESTERN PROVINCES: Manitoba, Saskatchwan, Alberta and British Columbia.
TERRITORIES: Yukon and Northwest Territories.
b. Figures shown include only students with Canadian citizenship or landed-immigrant status.
c. Excludes Ryerson and OCA.
d. Includes students in non-university type programs for all years.
e. Where necessary, small numbers (less than 4) have been rounded to 3 to protect confidentiality of individual records and totals adjusted accordingly.
f. Percentages may not total exactly due to rounding.

FOOTNOTES: 1. Includes 'not reported'.
2. One institution did not report province of residence for any graduate students in 1976 (enrolment was approximately 500 full-time and 150 part-time students).

SOURCE: USIS 11010203 (unrounded special request).

# RESPONSES TO PTSQ	-	-	26,718	-	23,700	-	22,040	-	20,458	-

NOTES: a. Estimated part-time enrolment shown here is derived from the part-time student questionnaire administered in 1974-1977 and the course registrations reported on the CAB system each year. The percentage breakdowns in each category from the PTSQ were applied to a headcount figure obtained by dividing the course registrations by the average course load as reported via the PTSQ. For 1978 the same method was used but the percentage and course loads are those from the 1977 PTSQ. Due to the inherent errors of sample surveys and the lack of actual headcount data to validate any of these estimates, caution should be used in any analysis of these data.

b. All part-time estimates are rounded to the nearest 100.
